OPC Marketplace

Product information sheet

This document is intended to help Designated and Marketing representatives to collect the technical details of the OPC enabled products of their company from the product managers or development teams. Those information are needed that the designated and marketing representatives can enter the product details on the OPC Foundation Website.

Generic product information

Please provide the needed information about the product. Fields like the product description can also be provided in other languages like Japanese and Chinese.

OPC UA specific Information

Those OPC UA specific information are required to add a product or service to the OPC Marketplace. If you are missing those details, please contact your development team to gain most current information about the supported feature set. Please note, that the product details are NOT necessarily the same as the supported features of the Software Development Kit (SDK) or Toolkit being used for the product development.

A full list of available profiles and facets can be found in the Profile Application of the OPC Foundation publicly available at:

https://profiles.opcfoundation.org
